---

Its secrets are recorded in its craters, plains, and rocks. This guide reveals the secrets that lunar scientists have uncovered since the Apollo missions. And what else is important, this guide shows how to master the energies of these secrets in order to use them for your own purposes. This guide, like the lunar complex itself, offers three levels of opportunity. The first one is for those who want to study the secrets of Nature, hidden at the base of the craters and on their slopes. This level is called "Space School of Life". The second level is for those who are interested in the problems of human life. This level is called the Human Space School.
