Theme song is great. 9 STEAM_0:5366723 Save money and buy this game. Honestly it's a quality game with great musical backing by some of the game's composers. 8 This was a fun little game and this soundtrack cements that. I heard the guy who did this had done RPG, action games and other games in the 90s. The game music is very action friendly to listen to and definitely has character to it. The chirps and warbles are catchy to say the least. I love the feeling I get when I play the game. I'm in Frog Fractions chirping d41b202975

What's new in Frog Fractions: Soundtrack Of The Decade Edition:

Part 13 Next week the Frog Fractions soundtrack will be released officially over at My Band Camp. If you weren't a part of that Frog Fractions bit in 2012 - fear not, we're releasing all of the short films on their own as separate albums. Here's the next one to release. I wound up feeling pretty great about what Frog Fractions did with its soundtrack. Their best work to date. Yay. This was made by Uproek, who is a prolific new talent. He did another side-step of the interactive type and made a full-blown EP with rap, sung. It's a really good tune. It's sort of an homage to the style that you find in modern hip-hop from Jay-Z to certain Beastie Boys members, and also fits right in with the bounce of the film and the "where's that bass" vibe that I picked up on early when I was writing the soundtrack. It's another piece of music that I really like. 19 Responses to "Frog Fractions: Soundtrack of the Decade Edition Part 13" those ef ciscos fall down all the time. I mean is it me or am I getting really sick of it?! its making me nuts, so I will probably stop listening for a bit until the new year has passed and I feel better. Those EPs, while pretty cool, I think are way too long and they're becoming a little muddied in the mid-section. And, yea, spending 1500 on a demo now is a little hard for me to swallow too. I could see making an RSD exclusive, but I think the DLC for \$9.99 (screw it, let's make it free) is a bit much. The interview with "The Blessed" is amazing. That's just such an awesome brush-off of the ignorance and stupidity out there. I'm definitely not going to buy the PS3 version. Buy the 360, support the new game's developer so that we can get it on the PS3 next time. Or get it on Wii or PS3 in the next generation in any other way. I'm just not going to pay more for a different platform. Though I should mention - I think I may buy it. I mean
